

A thick dark blue vertical bar is positioned on the left side of the page. To its right, several thin, curved lines in shades of blue and grey sweep upwards from the bottom left corner.

WEEK 1

REPORT ON WEEK 1

PRANITHA KEERTHI

01719717

- The present html files are developed using SVG in javascript.
- This week assignment helped in developing skills on SVG. Using SVG the coordinates for top, side and front are given respectively with additional features of providing the colour and width of the line.
- This 2D assignment is a start for me to gain knowledge about the graphics in 2D perspective which is a start to learn about 3D development.
- The 2D elevations is to gain a perspective regarding the 2D views which can be further used to form a whole figure, i.e., 3D object using WebGL.
- This 3D object will then be used to apply 3D transformations and other objectives of the project on that specific object.
